

Post Test Questionnaire

The post test questionnaire asks basic questions about your experience with the usability test. This questionnaire should be completed after testing the individual prototypes.

* Required

Initials *

AA

Rate your overall experience *

	1	2	3	4	5	
Not pleasant at all	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	Very enjoyable

Rate the difficulty of the tasks you were asked to perform *

	1	2	3	4	5	
Very easy	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very hard

Which task(s) did you have the most trouble with? *

- ☐ Task1: Search for a specific avatar
- ☐ Task2: Turn the video output on/off
- ☐ Task3: Choose Alan Rickman as the current avatar
- ☒ Task4: Choose sad emotion for Alan Rickman
- ☐ Task5: Remove and then add Rowan Atkinson from favorites
- ☐ Task6: Add a new avatar
- ☐ Task7: Add a happy picture for the new avatar
- ☐ Task8: Set the new avatar's newly added happy picture as the default happy picture
- ☐ Task9: Delete the default image for the new avatar
- ☒ Task10: While choosing Mel Gibson, enable detect facial expression mode

Why did you struggle the most with the above tasks?

For Task 4, I wasn't sure where to click at first and ended up clicking the wrong thing on the first try, but after that didn't work it was quite clear where I had to click. For Task 10, I was slightly confused as to what the detect facial expression button was meant for based on what the outcome of clicking it was, but I figured it out shortly after.

How aesthetically pleasant did you find the prototype? *

Would you like to use this app for your daily life? *

- ☐ Yes
- ☒ Maybe
- ☐ Not really

If you'd like, please tell us why

In terms of the aesthetics, the app seemed to be a bit cluttered with all the different panels that did different things. I feel like it would make more sense to have the main panel that shows your current emotion as the focal point, with all the other panels (like the avatar selection, default emotions) being smaller. I would consider using this in my daily life because it can be useful, but I don't feel like it is necessary for me to always show my emotions during video calls.

Do you think this app will help you better express your emotions during teleconference? *

- ☒ Yes
- ☐ Maybe
- ☐ Not really

If you'd like, please tell us why?

If I were to use this app, it would definitely help me express myself more, for the simple fact that I never turn my camera on, so it would at least give me some form of expression.
