

Pre-test questionnaire

Thanks for your participation, kindly take your time to answer the following questions before performing the provided tasks for testing our prototype.

Initials *

MR

Age group *

☒ 18-25

☐ 26-35

☐ 36-50

☐ 51-60

How often do you use teleconference platforms (Zoom, Skype etc.) *

☐ More than 6 times per week

☒ 4-6 times per week

☐ 1-3 times per week

☐ 1-3 times per month

☐ Other:

What do you normally use teleconference platforms for? *

School (Lecture, Conference)

Work

Socialize with friends/family

Other:

Do you normally turn your camera on during a teleconference session? *

Yes

No

Maybe, depends on the situation

Do you think the current teleconference platforms on the market allow participants to fully express their emotions without imposing them to turn on their camera? *

Yes

No

If you answered the previous question as no, what do you think can be better?

From what I know there are only chat, thumbs up and thumbs down options. They can add emoji options to display faces.
.....

Do you think current teleconference platforms offer satisfactory interactions between participants and the speaker? *

☒ Yes

☐ No

If you answered the previous question as no, what do you think can be better?

Do you think the current teleconference platforms on the market allow participants to fully express their emotions without imposing them to turn on their camera? *

☐ Yes

☒ No

If you answered the previous question as no, what do you think can be better?

Maybe we can send emojis, and the software can display it next to our profile pictures

Do you think current teleconference platforms offer satisfactory interactions between participants and the speaker? *

☐ Yes

☒ No

If you answered the previous question as no, what do you think can be better?

I think the participants and the lecturer should have easier ways to interact non-verbally.
